

## **BLEEDING FROM THE KIDNEYS AND URINARY PASSAGES—HEMATURIA.**

This may arise from the presence of stone in the bladder or kidneys, or in the tubes that convey the urine from the kidneys to the bladder, or it may be caused by inflammation of the bladder or kidneys.

**Treatment.**— If inflammation exists, it must be reduced. See Inflammation of Urinary Organs. Cold or cool **sitz-baths** and injections are the local appliances. The general health should be well attended to.
