The quantity received at the Geeong railway station yesterday was an nerease on that of the previous day, he amount forward totalling 1999

the amount forward to an of the set of the set of the barges. The wheat that had been placed aboard the barges Edward Pembrake, The which is lying alongside the railway pier, was supplemented yesterday by 1002 bags, and this represents a good day's work, considering that is loading is only proceeding at one hatch. The vessel is not expected to be detained here for any length of time.

time. A commoncement was made yester-day with "stiffening" the barque Bayard at the Yarra-street pier with wheat, a fair quantity of which was deposited in her fore hatch. The vessel will draw alongside the railway pier some day this week to complete the belonce of her leading expections the balance of her loading operations.

AN EVENING WITH THE FOUNDER OF THE CHURCH ARMY.

ANNUAL REPORT. The annual REVIAL REPORT. The annual report of operations during are the principal paragraphs :-In presenting the report of operations during 1898, the council desire to con-grantalete governors and subscribers upon the fact that the year just closed has been in many respects the best for a considerable period, were theroughly gone into at the beginning of the year, and, as a result of a deputation to the Minister of Education on the subject, the Government grant has been raised to E350. The year commenced with an overdraft of £90 3s, but, owing to the extension of the Government grant and reduction in salarice paid to secretary and caretaker, and the increase in domains and students' fees, your council are ablo to report that a small credit balance is in hand. A satisfactory item in the receipts for the year is the advance in the amount donated by the public, the aggregato received being the largest since 1892. The same can also be said of fies paid by students; the amount above an increase of £205 soverhast year's total, and also exceeds that of any previous year since 1892. The classes least year with the exception of German, while now elasses have been formed in geometry and elocution. Reference must be made to the satisfactory increase in the priming and chemistry classes. Tho formation of the councel, but princi-has not basen included in the syllabus. It is to be haped, however, that in the coming year this important study will bo target. Owing to take of rules the aminis-trators which had a deterring infinence, the solution and the deterring infinence, the solution and the deterring infinence, the solution and the deterring infinence, the solution and a gratifying increase, especially in the 5rd and stit, there being an increase in the latter of 70 over the comisponding period last year, and in bot terms the eurolonges in data trators which had a deterring infinence, the solution and A. B. F. Wilson were appoinsed to fall the vacancies AN EVENING WITH THE FOUNDER OF THE CHURCH ARMY. Silent, loady, melancholy, the City itald-Lendon of the Bank and Stock Exchange, Post Office and Mansion House, Lordon of business, traffic, com-merce, the busiest city in the world—is like a city desertod from Starday even-ing till the great tide rolls back again on Monday morning. No one lives here, they only come to work here, and on the day of rest they leave the city lonely ; shops are shut, warehouses stand dark and gloomy, there are just a scattered few people in the quiet streets, making the loudiness more apparent, a few "bustes run at long intervals, the police-men staud aimlessily about—on week-day every norve alort to direct the floree rush of men and vehicles ; no sound comes-in place of the steady, dull rear of yes-forday—except a few mysteriously-sounding church bells. Then suddenly a great clash of martial music, and past me marched a strange band of white-surpliced men, boys, women, and little girls, a crowd of those they had provalled on to come with them, and a vociforous troop of bandamen, and floating over all a great crimson banner emblaconed with the words, " The Church Army." Going on to the Church St. Mary-at-Hill, Easteheary (five minutes from the city's leart). I cattered a darkmed church. WITH A MAGIC LANTERN SHOW in full progress. It was half-past six; this growd of thools were filled down every aisle, many patiently stood at the back the whole two hours, and, strange to see still, though less so of hate years, this crowding audience was almost en-tirely maschine, a woman only here and there amongst the crowfad rows of men and boys. Till seven the band played, a woman sang a couple of solos, the church rousined dark, and on the great sheet hung across the top of the church was a church except the reward and with macher began Ax EXTEAORDINARY LLUSTRATED Every part of the service—prayers,

GORDON TECHNICAL COLLEGE.

The annual moeting of the governors of, and subscribers to, the Gordon Techni-cal College was held last evening in the main classroom, and the othar was occupied by Mr G. M. Hitchcock, presi-dent of the institution. A pologies were received and accepted for the absence of Messrs G. F. Link and D. Powers.

Galage council, the chairman referred with regret to the fact that Mr G. F. Link was prevented by continued indis-position from resuming the place he had formerly occupied in regard to the management of the college. During the year the council had taken into consider-tion the subject of technical education in relation to agriculture, and he was glad that Mr Gurr, who was present, Would be able to assure the Minister that their interest in the matter showed no sign of abating. The increase of the college was particularly ap-plicable to institutions of this character. In conclusion he expressed the hope that their position in the colled by the report which the statistication of the showed no sign of abating. The increase of the difference of the colled by the proverb that hearen helped those who helped themselves was particularly ap-plicable to institutions of this character. In conclusion he expressed the hope that their position in the colled. Mr W. Humble, who seconded the restatishment of a school of mines in conjunction with the colled. Mr W. Humble, who seconded the last annual meeting. They were then the resolution, remarked that the gratifying report which they had heard was in marked contrast to that discussed at the last annual meeting. They were then institution or go on framother year. The latter course had been decided upon, and the expectations which they had formed regarding the energy of their newly-appointed secretary had been thoroughly regored that they were not in a position to give him ther muneration to which he was entitled, but that would come in time. (Hear, hear). The council could take satisficion from the consciousness that it was doing good work for the spong people of the town and district by affording them exportanities of improv-ing their education, and he regretted that the opportunities placed in their way by the college were not more largely availed of by thoses for whom they were in-tended. figures :-

EDUCATIONAL MUSIC & A PERIL FOR FRANCE, MENTRAL COLLEGE, GEEL (FROM OUR MELBOURNE CORRESPONDENT.) A recent cablegram from Europe has excited little or no attention ; and yet it is programt with meaning, and portentous in the extreme. It con-tained the bald statement that the national debt of France new stands at During 1898 nine pupils passed the Me

lation Examination. At the November Examination 100 pe was gained in Algebra, Geometry, F History and Physiology, and 71 per co Arithmetic. £1,400 000,000, and that the estimates £1,400 000,000, and that the estimates for the current financial year make provision for an expenditure of £140,000,000 sterling. Surely there is no mistaking the meaning of these figures. France is steadily, gliding down an inclined plane into an abyss of bashruptey. With a population that is stationary in point of numbers; with an anonyme army that draws A Kindergarten Class is in course of tion. Miss Clanchy will be at home on and Friday, the 27th inst., from 11 a.m. to to earol new pupils. With regard to the efficiency of Tesla's torpedo in practice, several objections have been raised. To begin with, the torpedo is steered from the ship or 'shore by the operator, who sends the electric waves while keeping his eye on two poles at the bow and stern of the craft. Now at the pow and stern of the craft. Now these poles will be difficult to see for more than a mile, and especially in rough weather, which, by the way, will also interfere with the reception of the electric wares by the torpedo. In this weather the operator will got be able to ace the the operator will not be able to see the poles of the torpedo at all. Again, what the operator can seo, the enemy under attack can seo, and take his precautions. Moreover (and this is an objection which we have pointed out in the case of the "wireless telegraph." for secret mes-sages), the enemy can influence the torpedo by electric waves sent out from an adjustable apparatus of his own, and neutralise the controlling waves from the shore, thus deranging the action of the torpedo celes turn it into another course altogether. In a paval battle such torpedo smight prove as dangerous to edoes might prove as dangerous to ds as enemies.

A RELIC OF BYGONE TIMES: A very curious and interesting dis-covery has been much by a local anti-quary, Mr W. A. Donelly, on the shores of the River Clyde, about a mile east of Dambarton Castle. Here has been found the remains of a "cranneg," or dwelling on piles, the structure being Sinated helow high-water mark, and about fifty yards from the water at low tide. Its circumfarence is 184 feet, the outer circle of piles being of ank sharpened to a point with stone axes, and still perfectly sound where the woods a used in this andicat dwelling-place of man are bired. ground. The other woods used in this ancient dwelling-place of man are birch, sub, &c., and are used for the transverse beams and for the pavements. Twelve fact outside the structure extended a huge fact outside the structure extended a huge for the use of dogs, cattle, sheep, &c., a hone or whelstone, and distinct evidences of the use of fire. In the immediate meighborhood has also been discovered a cance, 37 feet long, with a beam of four feet, and hollowed out of a single cak tree. This pile-dwelling is of more than ordinary interest in that it seems to be the first which has been found in tidal water.

attack of indigestion, accompanied rils, by regulating the action of the r the ase of Wolfe's Schuspps.-

sure in formally moving the adoption of the admirable secretary. As it dealt with every matter of interest in connection with the college, there was little left for bim to say in regard to the general work of the institution. He might, however, fairly congratulate those present and the public of Geelong also, upon the improved condition of the college. Last year they were heavily in debt but on this occasion they found them-selves in possession of a small credit balance. True, this was not to be attri-buted so much to an improvement of only a coward-laugh to conneal shame. He besought then to be confirmed, and to get ready for the last terrible "examina-tion which a man had but one only chance of passing; and then be ended, and all sang a Church Army hymn with a rousing chorus. Then some went, but many stayed to bear witness of their own "experiences," in a fashion strange to the Established Church, but well enough known among Dissenters.

Estimate Control, det wei chouge known among Dissetters. THE NETHODS OF THE CHURCH ARMY. It is no swalt thing to fill a huge church with workingmen at any time and place, but it is almost a great event to be able to do it Sunday after Sunday in the City of Leadon, when these more must come to do it submy after standy in the only of London, when those men must come often a very long way from home. It was more than an attentive audience—it was a rapt one—and it was all of the working class; even the "adjutants" Mr Carlilo, the founder of this wonder

il organisation, the Church Army, set imself to bring into the church the class ost in need, yet usually most neglected. te has adopted devices that seemed use-

He has adopted devices that scened use-ful from any and everywhere—anything to forther his nain object. Linnelight in a church is his own idea, probably from the Salvation Army come the street marching, the military hands, and the military names and ranks, from Dissen-tors the "Rovivalist" open moetings and extempore prayers. He does get his people to church, but the work does not end there; the Church Army has homes and shelters in all the poorest, most degraded parts of London. Efficent thousant pounds is collected and spent yearly on Homes for Insbriates, Homes for Criminals, for the deserving unem-ployed, on unrsing Sisterhoods, on coun-try colonies for the able-bodied who can get no work here, on preaching, teaching and resening.

get no work here, on preaching, teaching and rescuing. As one would expect, the founder, the Rector of St. Mary's, is a man of very great force and fascination, a man who knows how to approach the poor and degraded and help them, and who is not less skilful—or he could never have made a success of this huge organisation—in appealing to the rich and educated, and sccuring from them money and help.— English Paper.

A cure for indigestion, lowness of spirit wind, spasma, discases of the kidneys, paipita-tion, nervousness, cruptions, liver and stomach complaints will be found by taking KERNOT'S PILLS OF HEALTH, a safe reundy, contain-PLUES OF HEALTH, a safor structure of the start of the structure of the start of the structure of the struct

THANKS. A vote of thanks to the president which was proposed in culoristic torms by Messra T. Peters and J. Blakiston, was carried with acclamation. The president carried with acclaimation. The president in responding, again referred in terms o unqualified praise to the excellent work performed by the sccretary.

A PROPHETIC PREACHER,

A PROPHETIC PREACHER. A PROPHETIC PREACHER. The seventh day Adventists are holding their annual encampment this year at Ballarat, and their preachors are indulg-ing in prophecy. Pastor Daniells (Sydney) spoke on "The Eastern ques-tion as the prelude to a crisis forstold in prophecy." He prefaced his remarks by reading Luke xri, from 20th verse ouwards, and dealt with the destruction of Jerusalem by Titus. Having traced the history of the East from then to the present day, he soid a most soloan time ward of a tremendous revolution, and many people believed that the Eastern question would bring it about, and that God in His providence had brought it to the front thus carly to warn His people of the impeding change. The prochor then quoted Daniel xi., 45, the words in parentheses being his interpresation :---" And he (Tarkey), shall plant the taber-macles of bis palace (seat of Government) between the seas (the Dend Sea and the Mediterranenn) in the glorious hely mountain (Mount Zion, at Jeruslem.)" Continuing, he said it was admitted by everybody--by the Tarks themselves-that they must go from Europe, and where could they go but to Palestine ? The Tarks looked forward to that, and when in Jeruslem they expected the Eowers to assemble there and fight a great hattle-the Arungeddon of the Bible. Why was the Easter question to constantly before them, and their daily papers so full of it ? God had caused the adjust the facts about it might know of it and God's people be warued. Russia and Frane-had agreed that the Tark should be thrain they caped the news in head-lines, so that all might know of it and God's people be warued. Russia and Frane-had agreed that the Tark should be thrainform Europe. England would no longer support him, and what could Germany do alone? The balance that maintained the Tarkish compire in Europa had agreed that the Gospel had about doring the stack empire in Europa had parced that the Gospel had about dorid's meilator, was closing Hi selves in possession of a small credit balance. True, this was not to be attri-buted so much to an improvement of rovenue as to the practice of economics, which, while very well in their way, could only be regarded as tamporary in character. The secretary of that insti-tution was just as much entitled to be properly paid for the work he put into it as the secretary of the Eduation depart-ment. (Applause.) He held to the maxim that the labour was worthy of his bire, and it reflected every credit upon their secretary in the continued to work with so much vigor for the advancement of the institution, which had been raised during tho year from a state of depression into one of comparative, prosperity. Another thein was the increasing interest that was being taken in the subject of technical education, and this was aid to be strongly fell by the Educa-tion department itself. The Minister himself did not hesitate to declare that more would have to be done in that direction, and he had interested himself to the extent of gathering information to guide him in deciding us to the direction.

more would have to be done in that direction, and he had interested himself to the extent of gathering information to guide him in deciding as to the direction in which technical education could be best promoted. The council would give him an opportunity shortly of proving this sincerity by making application for a larger measure of assistance. Oue source of weakness was the absence of a physics class from the sylla-bus. No school of mines or technical institution could be considered complete, or even fairly so, in the absence of such an important class, and only the want of means had prevented the council from providing for its inclusion in the college sylhabus. Years ago, Professor Kernot gave them a valuable present for uso in connection with such a class, and it was intended now to make a further effort to supply the want by securing a first-class instructor, who would attract sudents. It was essential to the successful inauguration of such a class that they should get the best instructors possible. Nothing of a second or third rate character in this direction would answer requirements, and he trusted that the Government would prove to be thoroughly in carnest in their endeavors (o make this and kindred insti-tions as perfectly equipped as possible. In uoting changes in the personnel of the
